

All 4 mod groups run their respective rules with these exceptions.

All cars will be on the Hoosier S1 left and S2 right with a max wheel width of 12" and a minimum total weight of 2,600

WVSO legal b mods and South Sound legal mods the same per your class rules other than the mandatory tire, and 12" wheel option at 2,600 lbs minimum

Freedom mods and Speed tour mods with a 1" restrictor utilizing the governor with 1.000 pucks with everything else staying the same per your class rules at 2,600 minimum before qualifying and the race

You have to designate what class rules you are running by before qualifying and cannot alter from that. You also cannot combine class rules.

This will be an awesome event to bring all mod classes together for a big race.
